bamar técnicas, s.l.

- Technical Solutions and Industrial Engineering for the Food Industry
- Solutions for Fluid Conveyance in the Automotive Sector
- Industrial Engineering and Technical Supplies for the Pharmaceutical Industry
- Technical Supply Solutions for the Railway Sector
- Mobile Hydraulics Solutions: Parker Technology for Heavy Duty Applications
- Solutions for Industrial Logistics and Conveying Industry

bamar técnicas, s.l.

Who We Are

Company

With more than 25 years in the industrial supply sector, we have specialized in offering technical solutions tailored to our customers' needs. We have selected a product range that allows us to provide a comprehensive, personalized, and high-quality service in the fields of logistics, material handling, and automation.

Our commitment is based on close relationships and individualized service.

Facilities

Located nearby Barcelona, we have 600 m² of facilities, including a shop area to view products and warehouses with regular stock. Our logistics department maintains direct contact with manufacturers to manage urgent deliveries. In our workshop, we carry out assemblies and manufacture flexible hoses.

Origins

We come from a family-owned company founded in the 1970s, a reference in pneumatics and hydraulics. Since our beginnings in the automotive sector, we have continuously evolved, adapting to market needs.

The Technical Supplies Your Company Needs

At Bamar Técnicas, we have over 25 years of experience providing comprehensive solutions for industry: logistics, instrumentation, agriculture, and process automation.

- Specialized consulting across multiple sectors.
- Comprehensive service with leading brands.
- Fast response and personalized attention.

Technical Solutions and Industrial Engineering
for the Food Industry

Solutions for Fluid Conveyance
in the Automotive Sector

Industrial Engineering and Technical Supplies
for the Pharmaceutical Industry

Technical Supply Solutions
for the Railway Sector

Mobile Hydraulics Solutions:
Parker Technology for Heavy Duty Applications

Solutions for Industrial Logistics
and Material Handling

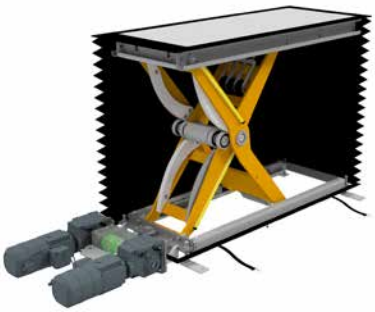

Heckert Engineering GmbH is a German company specializing in lifting solutions for the automotive industry.

Renowned for its patented beltdriven scissor lift table systems, which offer high reliability and efficiency in production lines.

Standard-format lift tables

Lift tables with dual motor and bellows

Double tables in tandem

Twin lifting tables

Tables for AGVs

Custom developments

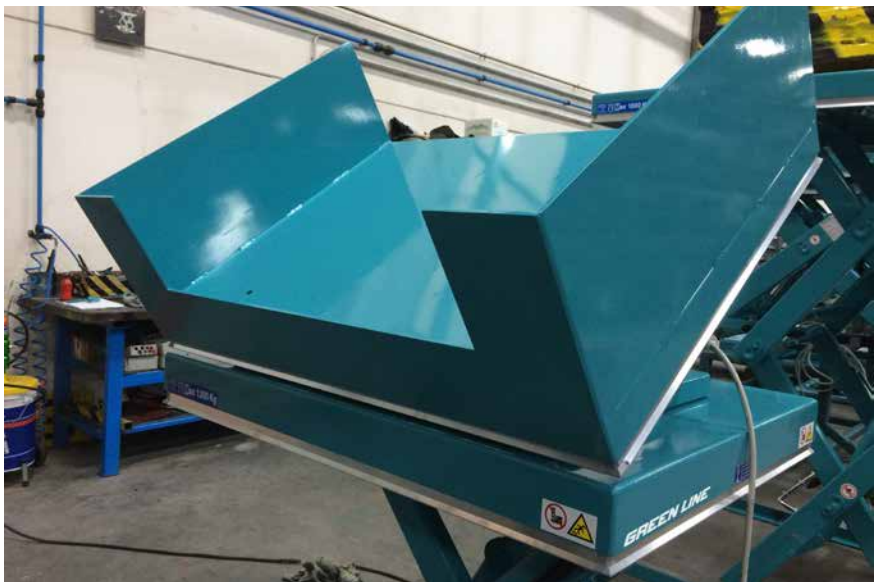

BOLZONI AURAMO

Bolzoni is one of the world's leading manufacturers of equipment for forklift trucks, forks, and platforms, offering the widest product range on the market.

For over 75 years, Bolzoni has designed, manufactured, and distributed equipment for forklifts, scissor lift tables, and industrial handling equipment.

Ergonomic work lifting platforms

Lifting platforms
for industrial applications

Lifting platforms with tilting surface

Vehicle loading lifting platforms

Ultra-flat lifting platforms

Double pantograph lifting platforms

Tandem lifting platforms

Lifting platforms with retractable
rollers in the upper frame

Parker Hannifin is a global leader in motion and control technologies and systems. For more than a century, the company has driven engineering advances that lead to a better future.

Its engineering and aerospace expertise spans all major motion and control technologies: electromechanics, hydraulics and pneumatics, fluid and gas handling, filtration, engineered materials, climate control, and process control.

Legris fittings and tubing

Sensocontrol

High-pressure tube fittings and connectors

Hydraulic hoses and fittings

Industrial and mobile hydraulics

Hydraulic filtration and diagnostics

EISELE

Member of HENN Connector Group

With decades of experience, Eisele offers more than 5,000 references of high-quality connectors, manufactured entirely in Germany.

The automotive industry has relied on our solutions for years, enabling precise flow adjustment and delivering maximum reliability and efficiency.

Our products are approved for numerous applications and are used by prestigious manufacturers such as Audi, Daimler, Porsche, and VW, endorsing their quality and performance.

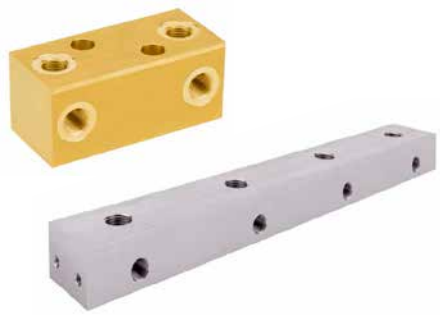

BASICLINE

MULTILINE

INOXLINE

PIPINGLINE

LIQUIDLINE

CLEANLINE

The High Pressure Pumps (HPP) division of Danfoss is a global leader in high-pressure pumps, valves, and energy recovery devices.

With decades of experience in designing water pumps for critical applications, it drives the development of piston pumps that transfer the advantages of positive displacement to high-pressure applications.

Danfoss customers benefit from top-quality products, strong R&D, and a global distribution and service network.

Danfoss HPP Products

Applications

GEMELS®

Founded in 1969, GEMELS specializes in the design and production of ball valves and quick couplings from ¼" to 42".

Its valves are used in sectors such as agriculture, automotive, marine, construction, and lifting equipment, where maximum precision and reliability are required. The range includes high-pressure valves, hydraulic valves, electric motors, and quick couplings, all complying with strict market standards.

Valves for the hydraulic sector

Petrochemical sector

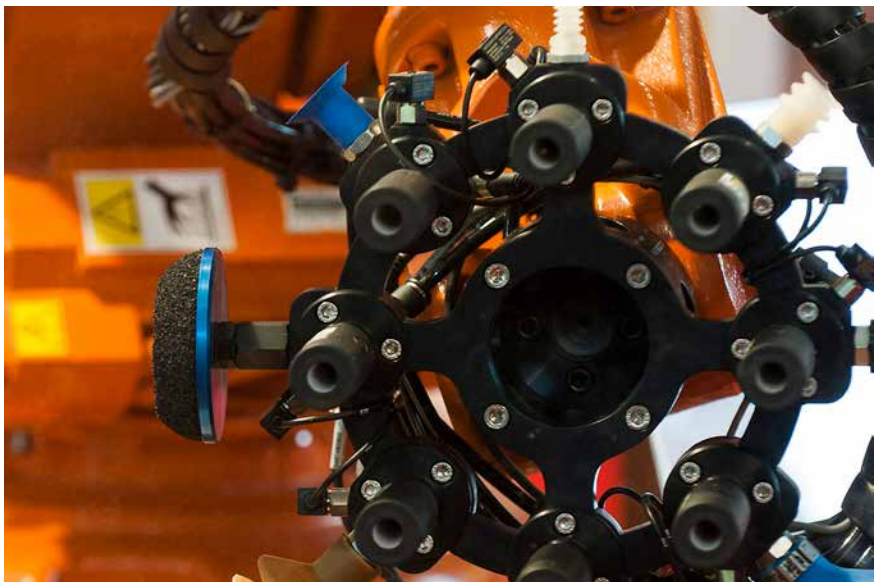

Oil & Gas

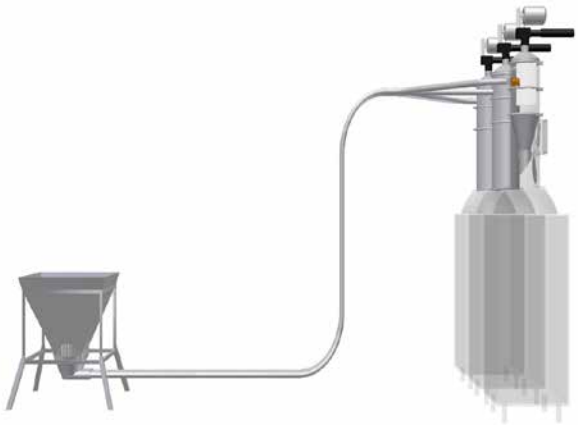

Valve accessories

We have been distributors of AR Vacuum Technology since its beginnings.

Vacuum, used in all kinds of processes, industries, and sectors, is one of the most versatile, costeffective, and clean technologies in industrial automation. AR stands out as a specialist in industrial vacuum technology.

Pneumatic transport

Vacuum generators

Suction cups

Vacuum accessories

AirTAC

Founded in Taiwan in 1988, with headquarters in Taipei, AirTAC is a well-known manufacturer of automation components in the global market.

AirTAC specializes in the production of air treatment accessories, control components, fittings, and linear guides, widely used in the automotive industry, machinery manufacturing, metallurgy, electronics, railway sector, environmental protection, lighting, textile industry, ceramics, medical applications, food industry, and packaging

Pneumatic actuators

Pneumatic Handling components

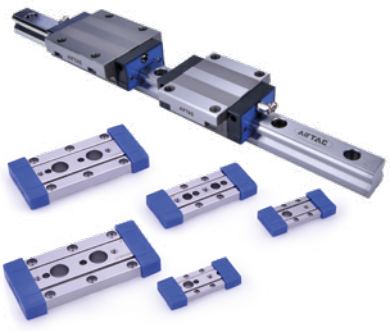

Complete range of solenoid valves, manual, mechanical, and fluid valves

Fittings and tubing

Filter units

Linear guides
