WATER PISTOLS AND WORKSHOP BLOWGUNS

Legris water pistols are designed to withstand demanding mechanical conditions (risk of crushing, heavy impacts, corrosive fluids).

Technical specifications

- **Fluids:** industrial water, oils and lubricants
- **Operating pressure:** 0 to 20 bar
- **Operating temperature:** -20 to +100°C
- **Regulations:** RoHS, REACh, PED

Performance depends on the fluid, material and tube used.

Components materials

Benefits

- **Excellent service life,** the spray gun is made of Zamak, which has been specially treated for industrial water transfer.
- **Control of fluid consumption** thanks to an adjustable nozzle that allows precise flow rate adjustment, thereby optimising the power and shape of the jet.
- **Ergonomic,** the handle is coated with technical polymer to improve user comfort.
- **Workshop blowgun versions** designed in nickel-plated stamped brass to resist corrosion.
